

Wright Armory Metal Finish Price List

- All pricing is for a matte surface finish. Unfortunately polished finishes are not available.
- **Dent, Ding, Scratch, and Pit removal is available but it is not included in the coating price. The coating will not hide any surface imperfections.**
- Tear down and reassembly is not included in the pricing listed for each finish.
- Tear down and reassembly is required for all parts to be refinished and may be done by the customer or by Wright Armory if the customer so chooses.
- All components for coating must be in a clean or lightly oiled condition. Any parts that are received in a dirty condition will be cleaned and charged accordingly.
- Any metal that has been previously plated or anodized **MUST** be chemically stripped prior coating.
- **Plating and chemical stripping fees are based on surface area, extra components for either process will increase the price.**

****All orders will have a \$10 per order shop fee****

Chemical Stripping		PRICE
	Bid Case By Case	?
Pit Removal, Dent Removal, Scratch Removal		PRICE
	Billed Hourly @ \$102.50/hr	\$102.50
