

- All pricing is for NT7® & NT7®+ with a matte surface finish. Polished finishes are not available.
- **Dent, Ding, Scratch, and Pit removal is available but it is not included in the coating price. The NT7® will not hide any surface imperfections.**
- Tear down and reassembly is not include in the pricing listed for each finish.
- Tear down and reassembly is required for all parts to be refinished and may be done by the customer or Wright Armory if the customer so chooses.
- All components for coating must be in a clean or lightly oiled condition. Any firearm that is received in a dirty condition will be cleaned and billed accordingly.
- All complete firearms will be test fired before and after coating to ensure function. Some cycling marks may be present.
- Any metal that has been previously plated or anodized **MUST** be chemically stripped prior to NT7® or NT7®+ processing.
Wright Armory can have the parts chemically stripped if needed. Chem Stripping will be bid on a case by case basis as the pricing varies significantly with the design of the part and thickness of the previous finish that needs to be stripped.
- **Previously anodized aluminum pistol frames cannot be coated in NT7®+ as the chemical stripping process has in the past created dimensional tolerance issues which can cause reliability issues or safety concerns and in some rare cases destroy the frame. The only finish option available for previously anodized pistol frames is cerakote.**
- Aluminum pistol frames such as CZ's or other brands which have not been previously anodized can be coated with NT7®+
- **Plating and chemical stripping fees are based on surface area, extra components for either process will increase the price.**

****All orders will have a \$10 per order shop fee****

Estimated Leadtimes (As of 3/5/2024)
Stripped Parts: 6-8 weeks (for orders that are recieved as stripped parts in a clean condition)
Assembled Parts: 10-12 weeks (for orders that require diassembly, gunsmithing, or fitting)
*****Actual leadtime will vary based on backlog*****
